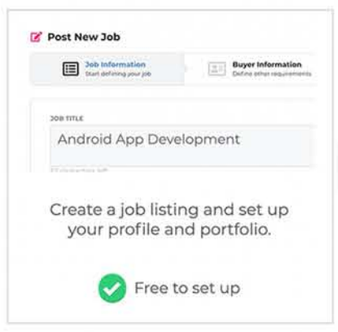
Selling on Revolancer

1. Create



Create a job listing and set up your profile and portfolio.

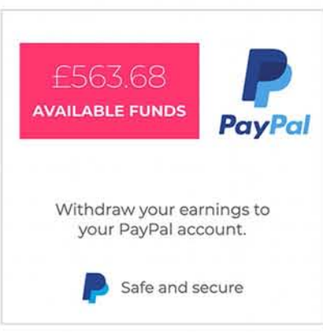
Free to set up

2. Hustle

Share your profile short link with buyers, earn affiliate commission.

Network growth

3. Earn

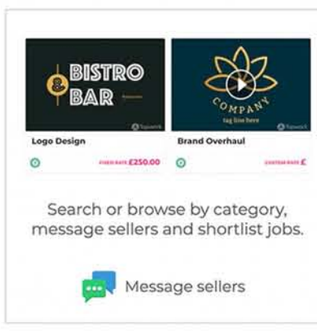


Withdraw your earnings to your PayPal account.

Safe and secure

Buying on Revolancer

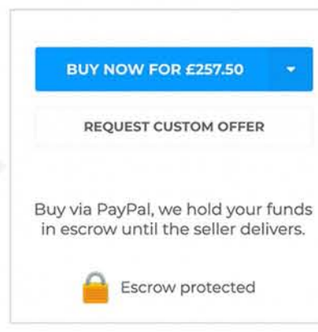
1. Browse



Search or browse by category, message sellers and shortlist jobs.

Message sellers

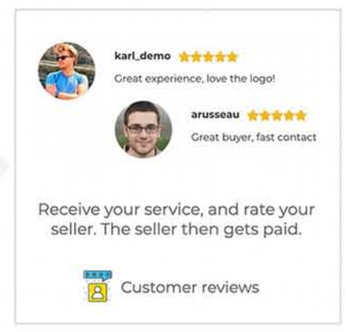
2. Buy



Buy via PayPal, we hold your funds in escrow until the seller delivers.

Escrow protected

3. Benefit



Receive your service, and rate your seller. The seller then gets paid.

Customer reviews

Quality control through Artificial Intelligence

Why quality control?

Conventional freelance platforms have limited to no quality control, as a result of the additional overhead it would cause to manually check each listing.

Quality control is essential to ensure businesses get good value for their money.

Quality control through AI

We have developed an in house ensemble classifier, using a range of machine learning techniques to accurately estimate whether a human would approve or reject a job listing.

Through this, we can scale and ensure quality, without the overhead of manual approval by humans.

How does it work?

Every time a new listing is evaluated, over 30 unique features from that listing, along with the approval status is added to a database.

The classifier then takes that data, and uses it to learn to predict what a human would decide.

Training accuracy **≈ 80%** *

** our classifier is training on **REAL** data from Topwork*
