

PARASOLAR

REDEFINING OUTDOOR COMFORT

 @PARASOLAR

 @PARASOLAR_OFFICIAL

The problem:

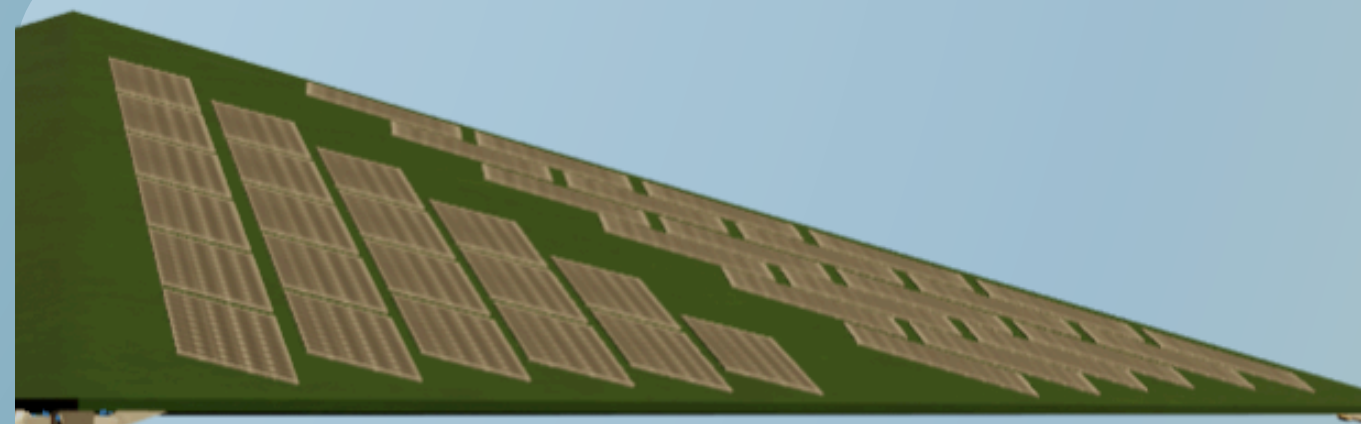

- Devices running low?
- Need protection from the sun?
- Fed up with wires everywhere?
- The sun is setting but you want to keep the fun going?

The Solution:

PARASOLAR

The smart, luxurious and eco-friendly Parasol that combines shade and power.

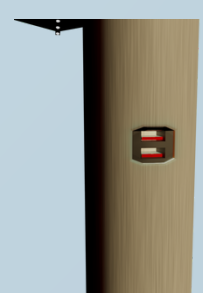

Unlike typical parasols, Parasolar creates a **comfortable** and **convenient** environment for its customers even in the most remote locations. Its **self sufficient power source** offers up a **sustainable solution** to improving outdoor enjoyment no matter the time of day.

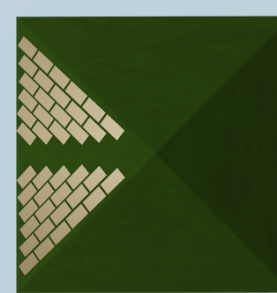

Our Product:

The canopy is embedded with **high-efficiency solar panels** that generate **clean energy** all day long. The energy is stored in a **powerful battery** built into the base, providing you with **reliable power**, even after the sun sets.

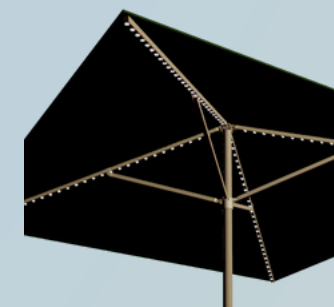

Features:

x2 USB ports

Solar tracking solar panels

Integrated features e.g. LED lights

“The product you are looking to bring to life sounds extremely **innovative** and seems to combine that of **style** and **sustainability** which would satisfy large sums of customers”

Thomas McGuiness – Sales Administrator, Allens hire
